(VITYARTHI)

DIGITAL LITERACY AWARENESS

01 What is Digital Literacy?

It is the "grammar" of the 21st century. It involves:

- Critical Thinking: Determining if an online source is "fake news" or credible.
- Technical Skills: Using software like the ones mentioned in your prompt (Canva, Miro) to create content.
- Ethics: Understanding copyright and how your digital footprint affects your future.

02 Useful Digital Tools for Students

To make design practical, consider featuring these categories:

- Organization: Notion or Google Keep for note-taking.
- Collaboration: Miro or Trello for group projects.
- Design: Canva for presentations and posters.

03 Safe Internet Practices and Professionalism

This covers how you protect yourself and how others perceive you:

- Safety: Using Two-Factor Authentication and strong, unique passwords.
- Email Etiquette: Always using clear subject lines and a professional greeting (e.g., "Dear Professor" vs. "Hey").
- Online Presence: Ensuring your LinkedIn or social media profiles reflect a version of yourself you'd be proud to show an employer.

04 Professional Email Etiquette

- Clear Subject Lines: Include your specific issue .
- Formal Salutations: Use "Dear Professor [Name]" or "Dear Dr. [Name]" instead of "Hey."
- The 24-Hour Rule: Respond to professional emails within one business day, and wait at least 48 hours before sending a polite follow-up.
